Welcome to the new BCSL!

Thank you for joining the Brown County Seed Library email list. We are excited for you to grow with us this new resource for Brown County. Our first newsletter will be sent out after the launch party, but I wanted to give a quick shout out to everyone who has helped us turn this idea into reality, especially those who turned out for our seed sorting event. We now have thousands of seed packets ready for distribution! Below is a list of local garden related events. We will try and collect information on what is available for people in the area and post each month. Hope to see you at the Launch Party!
